

Meet your participants on the web!

For language teachers

Online exercises

With *LearnInTouch* improve the contact between your teachers and their participants

The school is instantly notified of any new contact and can engage its future participants in a playful way.

Language tests for your participants

Visiting participants can be offered online language exercises to assess their skills and advise them on a language course.

Simple for teachers

The school offers a ready to use course material to its teachers. A teacher can send lessons and exercises to his participants. The exercise results are automatically sent to the teacher freeing him from manual corrections.

Assist your participants

The participants are reminded in advance about their next lesson. They can review the lesson, do an exercise and see their results immediately. Ready to meet their teacher, they profit more from his teaching.

Courses

Interactive lessons

A lesson is composed of some text, images and audio content. An exercise has several pages of questions with answers to choose from or to type in. It can also be a text to fill in. A time limit can be specified and questions can display hints.

Participants' results

The exercise results display the correct and wrong answers, the ignored questions and the participant's grade.

Your course material

The school offers a formatted course material to its teachers, using its own existing courses and can create new courses.

The web is our common language

Engage your participants in a fun way !
